## Push-In Fittings

The introduction of this new Pneumax push-in fittings catalogue supersedes our highly successful "Omni" catalogue which was first launched in the early 1990's.

We have on offer an extensive range of Technopolymer fittings which are suitable for nylon and polyurethane tubing up to 16mm O.D. as well as the introduction of our new range of "all metal" push-in fittings; which have been introduced to meet an increased requirement for fittings that can withstand more arduous applications.

*Please note:  
Fittings with taper threads are supplied with a pre-coated thread sealant applied and fittings with parallel threads are fitted with an O-ring seal.*
